

NUNO MATOS

COMMUNICATION AND WEB TECHNOLOGIES STUDENT

Master's student in the final stages of a degree in Communication and Web Technologies at the University of Aveiro, with a strong focus on backend development and scalable systems. Experienced in Node.js, Java, and Python, complemented by full-stack skills using JavaScript and React. Highly experienced in integrating AI tools into daily development workflows, particularly Claude, to improve productivity, support problem-solving, and accelerate software development. Currently contributing to the development of Ser+, a major University of Aveiro project designed to shape the university experience, both now and in the future.
